Dear Sir/Madam,

SUBJECT: REQUEST FOR ASSISTANCE TO COMPLETE GIRLS' DORMITORY

I, Fr. Joseph Florian Kavishe, CSSp the manager of Holy Ghost Fathers Vocational Training College (VTC), write to ask for a donation to help us complete our girls' dormitory. This building was constructed some years back, but we have not been able to complete it due to financial constraints. The roofing work is complete but what is left now is the finishing and fixtures. That is: the ceiling, windows and doors, plastering and painting, electrical installation and water supply system.

Short history: In 1993 the Congregation of the Holy Ghost Father's opened a Vocational Training Centre (V.T.C) for the most vulnerable youths. Who hails from challenging background in Tengeru – Arusha. There was a good response from the youths within Tengeru township and outside Tengeru. A good number of youths have been trained in this Centre. In this case the Centre has been established so as to minimize the growing rate of unemployment among the youths who have no skills to earn money for their life.

The Centre is now geared to provision of technical skills training in Carpentry, Motor Vehicle Mechanics, Auto electric, Welding and Metal Fabrications, Masonry and Brick Laying, Electrical Installation, Design and Sewing Technology, Computer Technology and Music. With such skills the Centre believes that its graduates can become self-reliant, since we aim at providing high quality skill training, that will enable them to graduate and so become competent, dynamic and confident entrepreneurs and qualify in labor market.

However, there have been much support from France when Frs. Joseph Mashaka, CSSp and Dyfrig Maliti, CSSp were working at the college. That's why we are looking forward to your support.

As we are writing to you, many girls who are enrolled in our technical school end up not completing the three years course because there is no dormitory for them and majority of them lack support from their families due to lack school fees, forced early marriages and even early pregnancy.

When this dormitory is completed, it would help young girls, who are studying at our technical school, to have a good place to stay and do their studies. It would also help the management to have close monitoring of the girls, especially after normal study periods. This would benefit them, as they would be within the compound, and therefore more dedicated time for their studies. We are hoping that our request will be considered so that we can help these young girls to reach their goals.

Cost:

	DESCRIPTION	ITEM	AMOUNT
A.	Materials for:	Plastering and ceiling board	11,790,000.00
		Painting and flooring works	4,635,000.00
